

SOUTH PRODUCTION NOTES

January 22, 2015
7-11 Shift Notes

BASF EMPLOYEES

59 Last Recordable
574 Last Lost Time

179 Days To RC Audit

Be sure to check weigh all bags off of the calciners and fill out the log sheet downstairs by the scale and Attach "Packaged By" label with your initials.

#1 MED / AI 3945:

Down until the spiral elevator can be worked on. Vacumax issues still need looked into.

Midnight shift: Spiral still down – we need an update from maintenance.

Day shift:

Afternoon shift: spiral still down.

#1 RC / AI 3945 next:

We have 5-6 bags on floor from recent batches, feed when Trimer hangers repaired and back online. Scale appears to be OK now.

Midnight Shift: waiting for Med line to be running.

Day shift:

Afternoon shift: Trimer running – waiting for feed.

Exhaust to F1, when feeding switch to Trimer

#2 MED line / Cu 0860:

Hold. Get all dried samples to the lab.

Midnight shift: holding

Day Shift: Starting batches again. Will run up to batch 707 then stop for the day.

Afternoon Shift:

#2 RC/ Cu 0860:

Running out last material on floor, then hold until Tuesday's batches are completed on MED and those will be calcined next.

Midnight shift: holding

Day Shift:

Afternoon Shift: finished with batches to be fed – holding for day shift

Exhaust to F1

#3 MED/ D-1780 NAQ:

Continue through midnight shift. Will replace gear box at the end of run when the liners come in. Work order written for east mixer seal

Midnight shift: oscillation belt still not working.

Day Shift:

Afternoon Shift: oscillation arm still not worked on. Med line down till morning

#3 RC / D 1780 NAQ :

Continue to feed. Use NAQ SAP SHEETS in MOD binder

Midnight shift: Fed bags on the floor, feed is off until last batches are made.

Day shift:

Afternoon Shift: continued when finished with feed- hold for more material or rescreens.

Exhaust to CTO- Watch suction

#4 RC / D-0222 KLP:

Tri-mer sump line hangers repaired.

Midnight shift: Running now

Day Shift:

Afternoon Shift: Tri-Mer running and #4 is feeding

Restart Trimer and send exhaust to Trimer – check with Kirk as he was working on controls for #4 RC pneumatic exhaust valve

#5 RC / Cu-0539 next:

Continue. We need to get a surface area from every pallet of drums that comes off the calciner.

Midnight Shift: Set up bag rack. Need to set up for 112 bags at station. @ 500 Lbs

Day shift:

Afternoon shift: Last of material through Calciner, need to switch out discharge station to a bag rack

Exhaust to 5 DC

#6 RC & Dryer / D-0257

Use Auto Sampler for bags, and get additional grab sample for each bag. Keep feed rate around 250. do not slam HC-11 elevator inner cage door!

Midnight shift: Running

Day Shift:

Afternoon shift: continue- clean around dryer and calciner

Exhaust to Sly Scrubber

6 Tank /D-5253 empty

Empty. Drain looked at by Schirmer and Lucas- not fixed yet

Acid washed 1-1-15 – MT 1-2-15

Midnight Shift: NA

Day Shift: NA

Afternoon shift: NA

New Pfaudler / D-0222:

Continue making batches. Lot 180 pour volume is .80. Lucas looked at 7 tank actuated outlet valve and advised that a new actuator was on order.

Midnight Shift: Pump is not working WOW.

Day Shift:

Afternoon Shift: did not make a batch continue on midnights.

7 Tank KLP solution:

Eliott advised that radar gauge on tank is not working. Will need repaired.

Midnight Shift: WOW for transfer pump, not working. Pfaudler loaded and ready for solution.

Day Shift:

Afternoon shift: monitor temps

Old Pfaudler / D-0257:

See the MOD for special instructions for the lot 9 1708 material that was brought in. Continue, rental DI water unit delivered and installed on Saturday for pfaudler and #3 mixer. You will not be able to pump the water using the RO unit pump...water will deliver by city water pressure, so it will be slower. NOTE: Be sure to sample drainage from each batch made on east pfaudler for D 0257 batches.

Midnight Shift: Continued

Day Shift:

Afternoon shift: continued

National Dryer: D-0222

Feed when material available.

Midnight Shift: no material

Day shift:

Afternoon Shift: no material available

PK Blender Selexsorb:

Scrubber repaired running batches now

Midnight Shift: Running

Day shift:

Afternoon shift: holding - manpower

Abbe Blender / 5206 Done

Done for a while. Area Cleaned

Afternoon shift: NA

Midnight shift: NA

Day shift: NA

Tower 3 / Cu 0860:

Loaded and holding for gaskets..

Midnight Shift: Will come down on day shift

Day shift:

Afternoon shift: continued

Tower 6 / Pd 1930:

Waiting for gaskets—All Pd has been repacked

Midnight Shift: Unloaded and reloaded. Drums will need to be leveled

Day shift:

Afternoon shift: should be down early on midnights

North Screener / Cu-0860:

Hold until we get material.

Midnight shift: Hold

Day shift: Hold

Afternoon shift: Hold.

South Screener / Cu-0860:

Hold until we get material.

Midnight shift: Hold

Day shift: Hold

Afternoon Shift: Hold.

#2662 (west) Pill Machine / AI-3917 T 3/16”:

Cleaning and changing to 3917- Sump repaired 1-12-15 & Air pump hooked up for backup.

Midnight shift: assembled and should be ready to start

Day Shift:

Afternoon shift: may be ready to start on midnights

#2664 (east) Pill Machine / AI-3917 T 3/16”:

Continue to run.

Midnight shift: continued

Day Shift:

Afternoon shift: continued

TK #2 / V 2046/V 2010:

Down for now. Will need to be switched to V-2010 Saggars

Midnight shift: NA

Day Shift: NA

Afternoon shift: NA

TK #4 / Cu 2508:

Continue. Putting full size sagger on the bottom and the half sagger on top.

Midnight shift: running

Day Shift:

Afternoon shift: Continued

Harrop Kiln / AI 3920:

Reviewed adjustable feed table with Kaput and discovered a number of items that need addressed before using (ramp leading to feed table needs to be removed, table needs bolted to foundation, vacuum pipe above feed table needs to be removed or relocated, feed table pivots easily and needs to be locked in place when adding or removing feed pallet). Will discuss with production team on Thursday regarding when to restart kiln.

Midnight shift: NA

Day Shift:

Afternoon shift: down

Building 27 Belt Filter / 6081:

There are more 116 bags in bldg now.

Midnight shift: NA -- did not move any totes from bldg. 24 west to decant water off top. Should be 7-8 left.

Day shift:

Afternoon Shift: Moved some of the totes from bldg. 24 W

Priorities 1 through 10 are basically all the same priority, should be considered urgent and will require call outs for maint issues and/or processing issues.

- 1) East Pfaudler/HC-11 Dryer/#6 RC/Sly
- 2) #3 MED/#3RC/CTO
- 3) #2 Line/#2RC
- 4) #1 Line/#1RC
- 5) #5 RC
- 6) South PK (Selexsorb/Al Pill Mix)
- 7) Horne Tabletting Machines
- 8) #4 Tunnel Kiln
- 9) South Precip
- 10) West Pfaudler/National Dryer/#4 RC/Trimer
- 11) Harrop Kiln
- 12) Reduction Towers
- 13) Reduction Tower Screeners

The West Pfaudler has moved down the list because of the re-piping that will take place the 1st week of February, that prevents us from jumping into the V-2045 P right after the D-0222 is finished.

Harrop Kiln, if all of the maint/contractor work is done, it can be used on Al-3920 T through next week until we have enough Al-3917 T off of the Hornes to keep it going on Al-3921 T.
